# Prostate Check Clinics

## Did you know?

You are at higher risk of prostate cancer if you are:

- **over 50**
- **Black and over 45**
- your Dad or Brother has had **prostate cancer**.
  
- **Black men** are twice as likely to get prostate cancer as other men. If you have mixed Black ethnicity, you may also be at higher risk.
- Because Black men have double the risk of prostate cancer and develop it younger, we strongly recommend talking to your GP about having a PSA blood test from the **age of 45**

We are holding two Prostate check clinics:

Derby City Prostate Cancer Screening Clinics
